Wood-processing in SolidWorks® with PASCAM WoodWorks

PASCAM WoodWorks is a neat tool collection based on the new semantic feature program technology. It enables the woodworker to create high-quality and safe models in the CAD system SolidWorks® in the most efficient way.

PASCAM WoodWorks offers a future-proof system for the requirements of the carpenter from today by the feature technology:

- § Filing the constructional conception on all levels by means of feature programs, part description and connection management.
- § Reduction of faulty designs by collision consideration and 3D modeling.

No matter which product line you manufacture: PASCAM WoodWorks supports you.

The universal tool for woodworkers and the wood-processing trades

Completely feature-based system

No restriction of the deducible model

Simple user interface also for unpracticed users

Filing of company specific modelling principles

Model administration with semantic features

Administration of simple till complex processing principles, including production data.

Simple profile construction with your specifications

Open variable administration

Meaningful product presentation by easy to use picture rendering

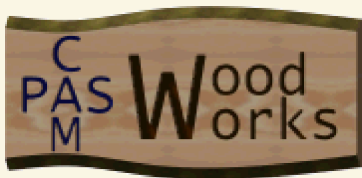

Simple animation of individual furniture

Associative deduction of the construction drawing from the 3D model, including sectional drawings and detail views

Arbitrary scales are possible

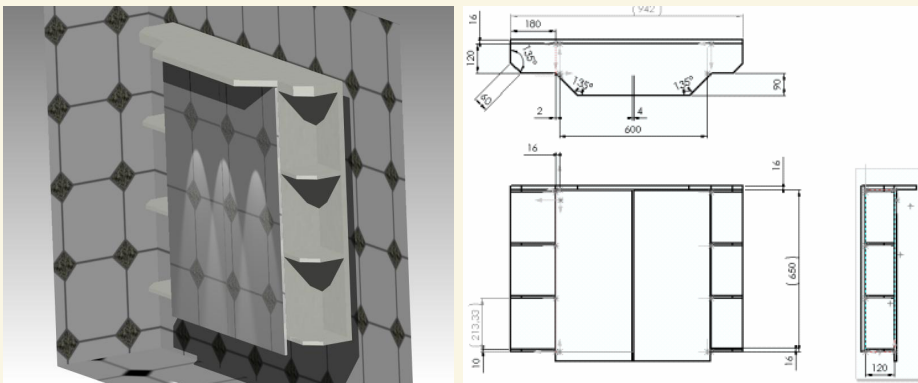

Standard based wood list generation

product information

Designed by <YourName>

The models are developed in *your* name, following *your* specific needs and defaults, exactly with the information *you* need.

| POS.NR. | MENGE | BENENNUNG | BESCHREIBUNG | Länge | Breite | Dicke |
|---------|-------|------------|--------------|-------|--------|-------|
| 1 | 2 | SeiteL | | 650 | 120 | 16 |
| 2 | 1 | SeiteR | | 650 | 120 | 16 |
| 3 | 4 | FachbodenL | | 180 | 120 | 10 |
| 4 | 4 | FachbodenR | | 180 | 120 | 10 |
| 5 | 1 | BodenUnten | | 600 | 120 | 16 |
| 6 | 1 | BodenOben | | 942 | 210 | 16 |
| 7 | 1 | Rückwand | | 942 | 666 | 16 |
| 8 | 1 | TüreL | | 690 | 316 | 6 |
| 9 | 1 | TüreR | | 690 | 316 | 6 |

You can variously use **PASCAM WoodWorks** for your company:

Use **PASCAM WoodWorks** in the *offer phase*:

§ for a photo realistic virtual product presentation.

§ for the quantity determination at the preliminary calculation.

Use **PASCAM WoodWorks** in *production planning*:

§ for the wood lists created automatically and the production data.

Use **PASCAM WoodWorks** in *production*:

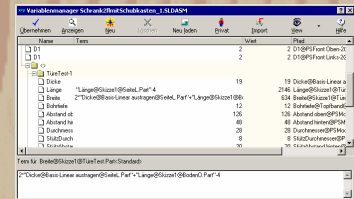

§ to the illustration of the product to be manufactured by drawings, slice and online available 3D models.

Powerful construction tool

A CAD system for all construction requirements

Variable manager for the comfortable input of dimensions and terms.

Assignment of the model characteristics, e.g. mass, surfaces etc...

Mating of models, e.g. fittings with doors, etc..

System requirements:

- SolidWorks 2005 or later
- Windows XP or later

Sales partner:
